Summary

Technical Support Specialist with **2+ years** in **Enterprise B2B SaaS**, delivering customer-facing technical support for cloud platforms while maintaining **95%+ SLA adherence** and high **Customer Satisfaction**. Skilled in **Java, Python, JavaScript, SQL, REST APIs** with strong foundation in **Root Cause Analysis, incident management, troubleshooting**, and cross-functional escalation workflows.[file:1]

Skills

Support & Troubleshooting: Technical Troubleshooting, Root Cause Analysis (RCA), Log Analysis, Incident Management, SLA Monitoring, Customer Satisfaction, Customer Onboarding

Tools & DevOps: Jira, Salesforce CRM, Git, Jenkins, Linux, Unix, Bash Scripting

Automation & Testing: Selenium, Appium, Postman, API Testing, REST APIs

Backend & Databases: Java, Spring Boot, Python, Node.js, MySQL, Microservices

Frontend: React.js, JavaScript, HTML5, CSS3[file:1]

Experience

Technical Support Specialist

April 2026 – Present

Smartsheet

Bengaluru, India (Hybrid)

- Deliver **Tier 1 technical support** for Smartsheet's cloud-based SaaS platform, managing case lifecycle via **Salesforce CRM** and troubleshooting issues across product features, integrations, and API workflows.
- Collaborate with **L2/L3 engineering teams** on complex escalations, contributing to **knowledge base** documentation that improves ticket deflection within the global **Customer Excellence** organization.
- Maintain **SLA compliance and Customer Satisfaction standards** while supporting enterprise customers across APAC/US time zones with structured troubleshooting and clear resolution documentation.

Product Support Engineer

January 2025 – March 2026

Qualitia Software

Pune, India (Remote)

- Resolved **300+ Tier 2/3 technical issues** through code-level debugging of Selenium and Appium frameworks, maintaining **95%+ SLA adherence** and reducing resolution time by **35%**.
- Engineered a custom **Java integration module for IBM DB2** within 36 hours using JDBC with connection pooling, retaining critical accounts and enabling seamless database operations.
- Authored **50+ technical knowledge base articles** with code samples, increasing self-service deflection by **40%** and improving customer onboarding speed by **20%**.
- Mentored **3 junior engineers** and trained **30+ QA testers** on product architecture and troubleshooting, reducing team ramp-up time by **40%**.

Associate Software Engineer

March 2024 – September 2024

Tech Mahindra

Bengaluru, India

- Provided **L1/L2 production support** for an enterprise loan platform processing **5,000+ daily transactions**, performing code-level debugging in **Java/Spring Boot microservices** and reducing incident response time by **25%**.
- Conducted **Root Cause Analysis (RCA)** on production defects using stack trace analysis and code references, enabling development teams to implement permanent fixes **30% faster**.
- Optimized **database performance** through SQL query tuning, indexing strategies, and join refactoring, reducing loan processing time by **20%** during peak periods.
- Executed API testing across **50+ REST endpoints** using Postman, creating automated test collections with JSON validation to ensure data integrity across microservices.

Projects

AI-Powered Log Analysis Portal | MERN Stack, LLM, Grok API

2025

- Built full-stack MERN portal integrating **LLM-based diagnostics** (Grok API) to parse Java stack traces and automate error analysis, targeting 40% deflection in L1 support tickets.
- Designed scalable backend APIs and optimized log-processing workflows, improving analysis speed and enabling real-time debugging insights for support teams.

Product Enhancement: In-House Code Editor | Java, Eclipse RCP

2025

- Analyzed **20+ escalation tickets** to propose an in-house IDE, creating technical specs and product roadmap projected to reduce setup-related support tickets by 30%
- Evaluated Eclipse RCP architecture and plugin ecosystem, delivering feasibility analysis and integration strategy aligned with existing product infrastructure.

Education

Bachelor of Engineering in Computer Science

Graduated: 2023

Visvesvaraya Technological University

CGPA: 8.6/10
